

NEW ADD-ONS from Retrospect

New functionality
increases your data
protection, delivers bare
metal recovery and
supports Windows 8!

New from Retrospect- VMware add-on

Retrospect's new VMware® add-on makes protecting ESX™ 4 and ESXi™ 5 virtual environments easy.

Easy to use - integrated into the Retrospect dashboard that you already know and use, with no new tools to learn or complicated processes to set up

Saves time and backup space - selectors help you to exclude unnecessary files and back up only what you want, while deduplication across multiple VM guests reduces backup time and space requirements

Restore what you want - no "black box" backups or restores — you have full visibility into backed up files, and ability to restore only the files you want- whether that means just one file or all of them.

Backup to tape - only Retrospect offers the option of backing up your virtual environment to tape!

Windows 8 compatible

Part Numbers:

- » **OPTNEWVMA080EC** Retrospect VMware Add-on with Annual Support and Maintenance
- » **OPTNEWVMA080EN** Retrospect VMware Add-on

Retrospect Dissimilar Hardware add-on

Quickly restore an entire computer, including the operating system, to new, different or repurposed Windows hardware to be fully functional in minutes!

Quick and easy recovery - restore a failed system to different hardware or a virtual machine with no lengthy setup process

Use it to replicate - move an entire system including OS, data and settings data from one computer to another.

Resolve driver issues - ensure that all drivers are current after a hardware update so that your boot process is not affected

Windows 8 compatible

Part Numbers:

- » **OPTNEWDHR080EC** Dissimilar Hardware Restore Add-on for Retrospect Unlimited for Windows
- » **OPTNEWDHD080EC** Dissimilar Hardware Restore Add-on for Retrospect Disk-to-Disk and Professional Editions for Windows
